About me

Trilingual Fullstack Developer with extensive experience in JavaScript, TypeScript, React, Python, Flask, and Java. Skilled in creating attractive and functional user interfaces, relational and non-relational databases, and RESTful APIs. I stand out for my ability to work in a team and efficiently solve problems. I am a responsible, empathetic, and communicative person, with a clear focus on the future and a commitment to the continuous improvement of my professional skills.

Professional experience

Huellitas Project (June - September)

Backend developer

- I developed the backend using MongoDB as the database (deployed on Atlas) and AWS S3 for image storage.
- I implemented security measures such as HTTP-only cookies, request limiters, ReCaptcha, and Google Login."

Job simulation - No Country (February - June)

Fullstack developer

- I implemented dynamic reusable components in each project to reduce code repetition and improve code readability.
- I implemented security measures such as password encryption and the use of tokens (JWT) for data management.

Cerrajería Alex project (Freelance)

Frontend developer

- I developed a landing page to showcase a client's services and provide users with contact information.
 - I handled the purchase of the domain and hosting service.
-
